

COMPANY PROFILE

**INNOVATIVE PAYMENTS DELIVERED
GLOBALLY**

January 2018

Mercury Processing Services International is a provider of payment solutions, dedicated to developing and managing its payment business on an international level. Company was established in 2009.

Located in Croatia and Slovenia, we serve clients from the financial and banking sectors across Central and Eastern Europe, Middle East and North Africa. Our portfolio is tailored to meet regional, local market or individual client requirements and business strategy.

Technological expertise is the main driver of enhancing and enriching our existing business relations, as well as the main source for innovations we provide in the payment industry.

ABOUT US

We are committed to our clients and their customers

Because our business depends on the accuracy and security with which we perform our operations, we aim for excellence in everything we undertake.

But our job is more than just running payments, but being adaptable and anticipating the needs of our clients, and developing new services to meet those needs and our clients' specific institutional context.

And take great pride in the quality of our work

In today's world, everything has to be quick and easy to use, and it's the same with payments. As all else in the life of consumers, paying for goods or a service needs to be a simple, quick and secure experience.

That's why our aim is to ensure that payment process adapts seamlessly to the lives of the customers, and not the other way around.

Together with the people who make it happen

A vital part of our every success is our team and their expertise, so it's imperative we keep an open environment where all of us can exchange ideas and knowledge.

Equally important, where our employees have the freedom and support to grow as individuals, team members and team leaders.
